“Magister tēla”

Education

University of California, Berkeley

B.S. IN COMPUTER SCIENCE AND ENGINEERING

- Officer, Computer Science Undergraduate Association

Berkeley, CA

Mar. 2010 - Mar.2015

Experience

Amazon Web Services - Computer Vision

Seattle, WA

FRONT END ENGINEER (L6)

Jan. 2019 - Present

- Principal architect and team leader of the **Rekognition Custom Labels** console, a fully managed-platform for the creation of AI datasets, and the training, and evaluation of image-classification computer vision models.
- Led delivery of the internationalized and globally available **AWS Textract** console: a data visualization layer for AI-driven object + character, key-value and table extraction from images.
- Designed and patented a browser-based system for the **Synthetic Generation and Automatic Annotation** of documents for use in Machine Learning training.
- Architected a **Native AWS Operational Pipeline** for consoles, allowing for the monitoring, alarming, and safe deployment of global, production applications with 0 downtime for the entirety of 2019.

Amazon Web Services - Rekognition

Seattle, WA

WEB DEVELOPMENT ENGINEER II

Nov. 2016 - Jan 2019

- Designed, developed and deployed the **AWS Rekognition** Console
- Supervised the operational logic of launching this console at scale, in multiple datacenters around the globe, from Dublin to Tokyo
- Built a **UI Toolkit / Platform for the Annotation of Machine Learning Data for Images**.
- Built validation and accuracy metrics / heuristics / pipelines for AI Data Acquisition, targeted at both in-house teams and external, Mechanical Turk workers

Amazon Retail - Photos

Seattle, WA

WEB DEVELOPMENT ENGINEER I

Jan. 2016 - Nov. 2016

- Built the Video Player for the Amazon Photos ReactJS application.
- Implemented the Img.ly photo editor for Amazon Photos
- Overhauled the boolean logic for the Amazon Photos Concept Filtering tab

Zaarly

San Francisco, CA

SOFTWARE ENGINEER

May. 2015 - Jan. 2016

- Sole engineer – took over sitewide operations and feature development for late 2015
- Built a dynamic Ruby on Rails site that provided live leaderboard rankings for Reecenichols Realtors@Zaarly
- Implemented Woopra Analytics for major site features, designing funnels to track the effects of major site changes on customer conversion and retention

Zaarly

San Francisco, CA

INTERN (FULL STACK)

jug. 2014 - May. 2015

- Architected the consolidation / pruning of a legacy database split between Postgres and MongoDB
- Built a template-based promotional and transactional email generation engine using Sailthru

Interests

Vocalist, The Miami:

[HTTPS://WWW.YOUTUBE.COM/WATCH?V=08iTpQTrZ7E](https://www.youtube.com/watch?v=08iTpQTrZ7E)

late 2015

- Released a catchy single and faded into obscurity
